

WAYNE STATE UNIVERSITY

COLLEGE OF ENGINEERING

Special award to be offered at the Detroit District Competition of FIRST Robotics.

Wayne State University Aim Higher Award

Wayne State University is more than a cluster of buildings where people earn degrees. Since 1868, it has been a university where opportunity is realized, whether one is taking the first step toward a college degree, or redefining the frontiers of human knowledge. It is a university of aspiration, where students and faculty constantly aim for higher levels of excellence and achievement. And it is a university of engagement, where students learn from the real world, and are prepared not just for graduation, but for life.

In honor of this 140 year history of students and faculty who strive to achieve the next level irrespective of the obstacles, the College of Engineering at Wayne State offers the Aim Higher Award. This award will recognize the team who, in the opinion of the judges, either took that next step forward in the direction and impact of their FIRST Robotics program or has made the most effective use of limited resources in fulfilling the mission of FIRST.

The Aim Higher Award has been awarded annually since 2009, which coincided with the 75th anniversary of the College of Engineering at Wayne State.
